

## What is jQuery?

- jQuery is a JavaScript Framework
- jQuery takes away the pain
- jQuery is a designers best friend
- jQuery is designed to change the way that you write JavaScript.

## jQuery Simplifies

CSS Selectors\$("a").css("color","red");

Chainable

```
$("a").css("background-color","green").click(function(){
   return confirm("Are you sure?");
});
```

- Web 2.0 Effects
- Easily Extensible
- Enhanced Browser Support.

#### Separation

- CSS Presentation from markup.
- jQuery Behavior from markup.
- \*Degradation\* (but do so gracefully)
- No more <a onclick="doSomething()" href=" ...
- Cleaner, Easier to manage code

#### Why I love it

- Immediately productive
- Excellent documentation <u>http://docs.jquery.com</u>
- Simple Syntax
   Prototype:
   new Ajax.Updater('placeholder', url, { method: 'get', parameters: par });
   jQuery:
   \$('#placeholder').load(url + par);
- Active Community
- Less is More

jQuery Best Practices

# Demo: Rating

http://kylebradshaw.com/presentations/jQuery/rating.php

## Tips

- Speed + Efficiency (jrules.js)
   http://somedirection.com/2008/03/14/structuring-jquery-for-speed-and-efficiency/
  - <body id="home">
  - if (\$("body#home").size()) {// only applies rules on the homepage}

## Tips

- Start building the degraded version FIRST
- Turn off JavaScript while testing
- Leverage Plugins
- Utilize <noscript>
- Inline JS isn't necessary

#### Demo: Comments

Toggle-able Items? - Degrade

```
Show/Hide with CSS .toggle_me (display:none;)
```

```
Enhance with jQuery $(".toggle_me").show(); $(".hide_me").hide();
```

• Ex. Comment Form

http://kylebradshaw.com/presentations/jQuery/comments.php

#### Avoid

- Never use jQuery inline
   these practices do not degrade with JS turned OFF
  - http://reboot.com
     a id="showAndHideComments"
     href="javascript:toggleVisibility('toggle');">
  - http://rightsagent.com
     <img onclick="return ra.popups.showPopup('register', 'txtNewUserEmail');" style="cursor: pointer;" src="/ media/images/Register.gif"/>
- Building HTML in JavaScript
- Ignoring Degradation "With great power comes great responsibility"

#### Tools

- Firefox
- Web Developer Plugin
- Firebug
- TextMate
- Sync
   http://somedirection.com/?s=agile+development+workflow
- MacBook (this is how I roll)

#### Plugins

- jQuery Form Plugin <a href="http://malsup.com/jquery/form/">http://malsup.com/jquery/form/</a>
- Thickbox Plugin
   http://jquery.com/demo/thickbox/
- jQuery Validation Plugin
  <a href="http://bassistance.de/jquery-plugins/jquery-plugin-validation/">http://bassistance.de/jquery-plugins/jquery-plugin-validation/</a>
- Live Query Plugin
   http://brandonaaron.net/docs/livequery/
- jQuery UI Plugins <u>http://ui.jquery.com/</u>
